Journal of Fluid Mechanics Volume 529 **25 April 2005**

P. Hall	On the non-parallel instability of sediment-carrying channels of slowly varying width	1
T. Peacock, F. Blanchette & J. W. M. Bush	The stratified Boycott effect	33
W. Schneider	Lift, thrust and heat transfer due to mixed convection flow past a horizontal plate of finite length	51
P. S. Berloff	Random-forcing model of the mesoscale oceanic eddies	71
A. Babiano & T. Dubos	On the contribution of coherent vortices to the two-dimensional inverse energy cascade	97
M. Arienti & J. E. Shepherd	A numerical study of detonation diffraction	117
T. K. Sengupta & A. Dipankar	Subcritical instability on the attachment-line of an infinite swept wing	147
M. Landeryou, I. Eames & A. Cottenden	Infiltration into inclined fibrous sheets	173
T. Gerkema & V. I. Shrira	Near-inertial waves in the ocean: beyond the 'traditional approximation'	195
Z. Li & R. E. Khayat	Finite-amplitude Rayleigh–Bénard convection and pattern selection for viscoelastic fluids	221
J. Kromkamp, D. T. M. Van den Ende, D. Kandhai, R. G. M. Van der Sman & R. M. Boom	Shear-induced self-diffusion and microstructure in non-Brownian suspensions at non-zero Reynolds numbers	253
P. K. Stansby & T. Feng	Kinematics and depth-integrated terms in surf zone waves from laboratory measurement	279
A. Iafrati & E. F. Campana	Free-surface fluctuations behind microbreakers: space–time behaviour and subsurface flow field	311
